

IMPRESSA X7

IMPRESSA X7: Coffee culture for professionals

The IMPRESSA X7 distinguishes itself both by its state-of-the-art technology and its user-friendly control functions. With its outstanding price/performance ratio and multiple possibilities of use, it sets completely new standards. The IMPRESSA X7 is different in every respect from other machines for the office and food-service areas: it is simple to install, easy to maintain and even easier to operate. It may well be the first „Plug-and-Play“ machine in the market. Once it has been connected to the mains, you only have to follow the clear instructions on the display panel and start making perfect Espresso, great Café Latte, typically Italian Cappuccino or finest Macchiato at the push of a button. Thanks to ultra-modern technology, the IMPRESSA X7 prepares coffee specialities just like a genuine Barista or a large, expensive gastronomy machine. Always fresh and always topped by a splendid, smooth crema. And – put your hand on your heart – isn't the atmosphere much more relaxed if you can enjoy a coffee?

Technical Data

Intelligent Pre Brew Aroma System®	■	Integrated rinsing programme	■
I.P.W.S.®	■	Integrated cleaning programme	■
Two cups in one brewing process	■	Integrated de-scaling programme	■
Pot of coffee in espresso quality	■	Token acceptor	optional
Height-adjustable coffee and cappuccino spout 75–155 mm	■	Card reader	optional
Two separate heating systems	■	Adjustable automatic switch-off	■
Auto-Cappuccino	■	Adjustable automatic switch-on time	■
Two high-performance pumps, 15 bar	■	Programmable brewing temperature	■
7-language Display-Dialogsystem	■	Recognition of de-scaling	■
Two spherical grinders	■	Adjustable water hardness	■
Two bean containers	■	Weight	17,3 kg
Programmable coffee mixture	■	Dimensions (B x H x D)	42 x 53 x 50 cm
Programmable powder quantity 5–16 g		Connection output	230 V AC / 2,2 kW / 10 A
Volume of bean container 280 g each		Testing	☉ CE
extendible to 500 g each	optional	Article number	13029
Volume of grounds container approx. 40 portions		Swiss made	■
Volume of water tank 5,0 l			
Automatic filling device	optional		
Volume of residual water container 1,5 l			
Daily capacity approx. 100 cups			
Hot water output approx. 10 l/h			
Preparation times:			
1 espresso (60 ml)		approx. 30 sec.	
2 espressos		approx. 45 sec.	
1 coffee (120 ml)		approx. 40 sec.	
2 coffees		approx. 65 sec.	
1 cappuccino (60 ml of coffee)		approx. 40 sec.	

IMPRESSA X7: Coffee culture for professionals

Display-Dialogsystem

The large Display-Dialogsystem (2 lines of 12 characters) gives operation-supporting and user-friendly information; optional in seven different languages. This makes operation easy and understandable, even for people without practice.

Auto-Cappuccino

The patented Auto-Cappuccino sucks milk directly from the pot or the packet, heats it and froths it up. Perfect milk froth for the ultimate Cappuccino experience is guaranteed.

Height-adjustable coffee- and cappuccino-spout

The height of the coffee spout for drawing off one or two cups of coffee or a cappuccino can be adjusted continuously. The height can be adjusted between 75 to 155 mm. In this way you can adjust the spout to different cup sizes, e.g. a glass for an Irish coffee. This guarantees a perfect crema and your machine remains clean.

2 separate heating systems

A second, separate heating system optionally ensures permanent steam or hot water readiness, which is particularly helpful in preparing cappuccino and results in great savings of time.

Individual coffee

For each key you can programme not only the coffee strength but also the water quantity and the temperature individually.

2 grinding gears

Two high-performance precision type grinding gears (conical grinding gears) with separate bean tanks are available. You can assign one of the two grinding gears to the different draw-off keys, or use a mix from both mills.

Programming panel

Flip down panel to access programming buttons. You quickly and simply adapt each draw-off key to your taste and your cups. Connection possibilities for external token acceptor and smart card are also available.

Care programmes

The IMPRESSA X7 comes with three different integrated cleaning programmes: one for the coffee section, one for the Auto-Cappuccino feature and a combined cleaning programme.
